## SUMMARY

I am an active developer and hard worker who is interested in growing new skills to contribute more to the web. Technology with a Full-Stack Development degree in React.js and Java.

From my mom's old washing machine to fixing electronics, my old Pentium 4 PC mother-board, fixing instruments, and installing hardware. Long story short, I find pleasure in solving problems, building things from scratch, and put things together. I love programming because it gives me the ability to write a line of code and tell it what to do for me. Building something modern and beneficial for others.

## RELEVANT EXPERIENCE

### CCOTH | Frontend Developer | June 2021 – Present | Huntington Beach, CA

- Led a small team of three developers to remodel church website using React.js, CSS, Firebase, Bootstrap, Java.
- Developed functionality to allow logged-in users to upload videos, post events to UI, update, and delete events.
- Used Firebase cloud to store images and MySQL to store data.
